

Children's Vaccine Immunisation Record

The Nursery requires to be kept informed by all parents of their baby/child's individual immunisation record as a matter of essential practice. Parents will be issued with a Child Immunisation Record form within their New Admissions Starter Pack. Details should be returned to the Nursery prior to the child's first attendance and it will be the responsibility of the parent to ensure that the Nursery is kept informed in writing of subsequent vaccinations received by the child in order that records can be updated.

The Nursery will not discriminate against children who have received only selected vaccines through parental choice.
